## **Detailed Action**

### ***Reasons for Allowance***

1. Claims 1-6 are allowed.
2. The following is an examiner's statement of reasons for allowance. The prior art does not teach nor reasonably suggest, as recited in claim 1 and an extendable and compressible section **extendable so as to be wound around the arm pivoting center shaft in accordance with the pivoting of the arm section and compressible so as to retract from the arm pivoting center shaft in accordance with the pivoting of the arm section.** The Applicant clearly shows an extendable and compressible section (96) in Figure 6 wound around shaft (88).
3. The closest prior art is Konishi et al (US 6,172,840) shows a magnetic recording and reproduction apparatus, comprising: a pivotable arm section; an arm pivoting center shaft for supporting the pivoting center of the arm section a capstan section for driving a magnetic tape so as to run a pinch roller provided on the arm section for pressing the magnetic tape to the capstan section; but does not show an extendable and compressible section extendable so as to be wound around the arm pivoting center shaft in accordance with the pivoting of the arm section and compressible so as to retract from the arm pivoting center shaft in accordance with the pivoting of the arm section.

These features, in combination with the other features of Claim 1 are not anticipated by, nor made obvious over, the prior art of record.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
